Subject : FIA Homologation Regulations for Safety Equipment update

Dear Sir or Madam,

We hereby inform you that the FIA has published an update of FIA Homologation Regulations for Safety Equipment, which can be found on the [FIA website](#)

The update has been introduced to clarify that once the safety equipment manufacturer submits a homologation request to FIA, the FIA may need to contact the ASN, safety equipment manufacturer and/or test house to obtain further information/clarifications such as complementary data, video, pictures and digital test reports.

The amendment to Article 2 Homologation Application Procedure is intended to facilitate the exchange of data, and to reduce the time required to complete the homologation requests.

Please share this informative note and take all the necessary measures to ensure that it is respected within your sphere of competence.

We remain at your disposal for any further information you may require.

The Safety Department
