

FEDERATION INTERNATIONALE DE L'AUTOMOBILE

2014 FIA FORMULA 3 EUROPEAN CHAMPIONSHIP
Clarification Note N°9 – to all FIA F3 European Championship Competitors

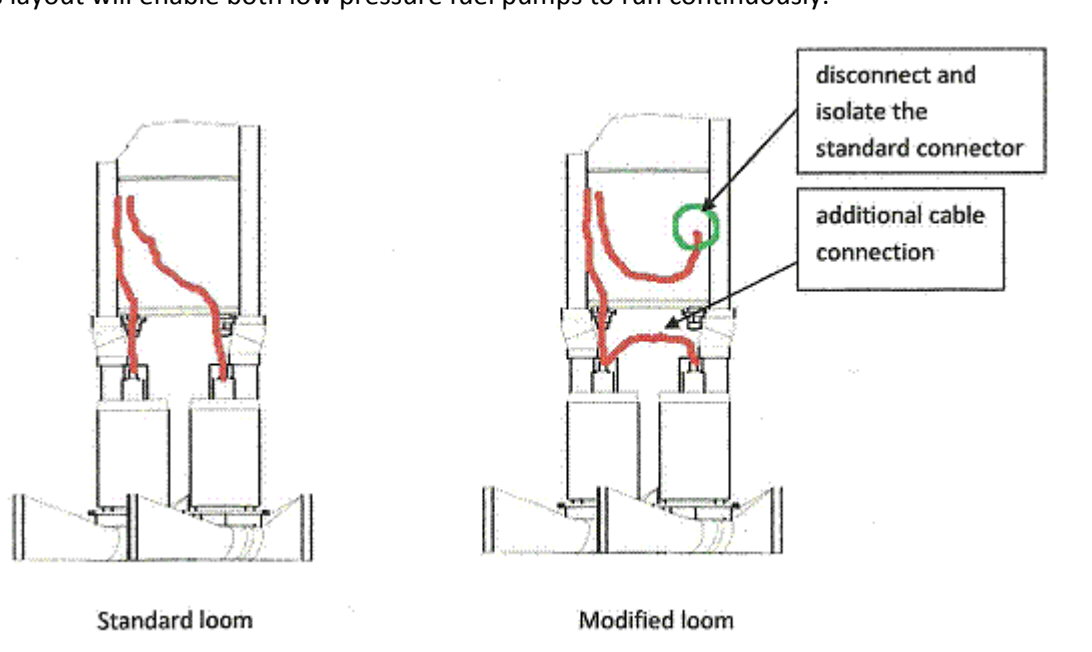

Geneva, 23 May 2014

Dear Competitors,

Please find below a clarification regarding the Dallara Fuel System pickup

In order to improve the fuel pick-up, an alternative method of utilising the low pressure pumps of the F312 fuel system is permitted

This layout will enable both low pressure fuel pumps to run continuously.

- With the Standard loom two positive cables and connections are fitted one to each fuel pump
- The modified loom will have an additional direct cable connection between the two positive poles of the pumps.
- The standard connector from one pole would need to be disconnected and safely isolated.

Please feel free to contact us with any questions you may have.

Yours sincerely,

Frédéric BERTRAND
Head of the Single-Seater Department
