Technical Report

After the qualifying practice session an asymmetric LHS front floor deflection test was carried on car numbers 07 and 11 according to Article 3.17.5.

Car number 11 was found in conformity with Article 3.17.5 of the 2013 FIA Formula One Technical Regulations.

However car number 07 did not comply with Article 3.17.5 of the 2013 FIA Formula One Technical Regulations as the front floor deflected more than 5mm vertically when the load was applied vertically to it at the point which lies 100mm of car centre line on the LHS.

I am referring this matter to the stewards for their consideration.

Jo Bauer

The FIA Formula 1 Technical Delegate
