### Technical Delegate's Report

The driver Max Verstappen used a previously used internal combustion engine (ICE) during the qualifying session where the FIA seals were removed from it without FIA supervision. As this is not in conformity with Article 28.4i of the 2015 Formula One Sporting Regulations, this power unit should be considered as a new one which then is Max Verstappen's eighth new internal combustion engine for the 2015 championship season.

I am referring this matter to the stewards for their consideration.

**Jo Bauer**

**The FIA Formula One Technical Delegate**
