### Technical Delegate's Report

#### During the first free practice session:

The tyre starting pressures of all cars during P1 were checked.

The instantaneous fuel flow of all cars was checked.

The fuel temperature of all cars was checked.

#### After the first free practice session:

Car number 33 was weighed.

Car number 33 was checked for the following:

- 1) Bodywork around the front wheels
- 2) Front wing height and overhang
- 3) Rear wing height and overhang
- 4) Front and rear wing width
- 5) Rear wing configuration
- 6) Rear bodywork area
- 7) Rear winglet height
- 8) Stepped bottom
- 9) Overall height
- 10) Overall width

The front and rear brake air duct dimensions were checked on car number 33.

The profile of the prescribed front wing section in Article 3.7.3 of the 2016 Formula One Technical Regulations was checked on car number 33.

The minimum distance between the adjacent rear wing sections at any longitudinal vertical plane was checked on car number 33.

It was confirmed for car number 33 that any vertical cross section of bodywork normal to the car centre line and situated in the volumes defined in Article 3.8.4 form one tangent continuous curve on its external surface with a radius no less than 75mm.

The concave radius of sections of the two rear wing elements which are in contact with the external air stream was checked on car number 33.

It was checked that all cars did not exceed 15000 rpm during the first free practice session.

The fuel pressure of all cars during the first free practice session was checked.

The logged pressure within the engine cooling system during the first free practice session was checked on all cars.

A fuel sample was taken from car number 12.

#### **During the second free practice session:**

The tyre starting pressures of all cars during P2 were checked.

The instantaneous fuel flow of all cars was checked.

#### **After the second free practice session:**

Car number 03 was weighed.

Car number 03 was checked for the following:

- 1) Bodywork around the front wheels
- 2) Front wing height and overhang
- 3) Rear wing height and overhang
- 4) Front and rear wing width
- 5) Rear wing configuration
- 6) Rear bodywork area
- 7) Rear winglet height
- 8) Stepped bottom
- 9) Overall height
- 10) Overall width

The front and rear brake air duct dimensions were checked on car number 03.

The profile of the prescribed front wing section in Article 3.7.3 of the 2016 Formula One Technical Regulations was checked on car number 03.

The minimum distance between the adjacent rear wing sections at any longitudinal vertical plane was checked on car number 03.

It was confirmed for car number 03 that any vertical cross section of bodywork normal to the car centre line and situated in the volumes defined in Article 3.8.4 form one tangent continuous curve on its external surface with a radius no less than 75mm.

The concave radius of sections of the two rear wing elements which are in contact with the external air stream was checked on car number 03.

The tyres used by all drivers during the sessions today have been checked.

A fuel sample was taken from car number 21.

The results of fuel analyses show that the fuels were the same as ones, which had been approved for use by the relevant competitors prior to the Event.

Further the density change of the fuel samples taken today was within the permitted limits.

All the above items were found to be in conformity with the 2016 FIA Formula One Technical Regulations.

**Jo Bauer**

**The FIA Formula One Technical Delegate**
