

## DECISION OF THE ENDURANCE COMMITTEE

To: ☒ Teams ☒ Manufacturers  
Category: ☐ LM P1 ☐ LM P2 ☒ LM GTE Pro ☒ LM GTE Am  
Decision N°: **17-D0015-LMGTE refueling equivalence - AMENDED**  
Date: **11/09/2017**  
Re: Refueling equivalence

### Mission concerned

Article: 7.4.3

☒ **2017 FIA World Endurance Championship Sporting Regulations**

### Decision

Each team must test and find the restrictor diameter for the combination car/pit system to achieve 35 seconds in LMGTE PRO for a complete refuelling volume\*\*.

Each team must test and find the restrictor diameter for the combination car/pit system to achieve 45 seconds in LMGTE AM for a complete refuelling volume\*\*.

This should be achieved with the 2017 WEC fuel at ambient conditions at each Event.

If a car is deemed faster than above, the technical delegates will check the refuelling time.

If the refuelling time is found faster it will be reported to the stewards.

For the purpose of the test of refuelling time, the conditions will be:

- The car's fuel tank will be emptied with the fuel bowser, leaving the rest of the fuel system charged;
- The fuel filling will be done with the autonomous tank completely full and the refuelling system as used by the competitor in race conditions;
- The fuel tank will be considered full as soon as fuel comes out of the vent line.

\*\* complete refuelling volume : the maximum onboard fuel volume is described in BOP table. However, the "complete refuelling volume" will be considered to be the fuel tank volume as run by the competitor in race conditions.

### Period of validity/application of the decision

This decision comes into effect:

- ☒ with immediate application
- ☐ from:
- ☐ from the following event :

And is applicable:

- ☒ until further notice
- ☐ for the above-mentioned event(s) only
