GENERAL INFORMATION

SOCHI AUTODROM SPECIFICS

UNIQUE FEATURES:

Sochi Autodrom is the first circuit in Russia to have hosted the Formula 1 Grand Prix and the only Russian Autodrom that operates all year-round.

The well-developed infrastructure - in close proximity to the Olympic Park and Sochi Autodrom - includes a wide range of modern hotels of different categories and a convenient transport network, with a nearby airport and a transport hub with train and bus connections.

Sochi Autodrom is one of the few Formula 1 venues to have team buildings specially constructed near the pit boxes. These buildings allow teams to operate away from their motorhomes, thereby simplifying logistics considerably.

Sochi Autodrom's Race Control building is the first in the world to have a video control system with Real-Time Full HD technology - ensuring high quality images on 56 screens tracking the cars. The system is based on data collected from 48 Speed Dome cameras located on the perimeter of the racing track.

Sochi Autodrom's engineers have developed a unique race protocol management system that was successfully tested at the 2014 Russian Grand Prix. The system allows engineers to manage the protocol in an automatic mode with the help of a special program in a real-time mode, which makes it unique in global terms.

OPERATIONS:

Motorsport Competition

Since the opening of Sochi Autodrom in September 2014, the venue has hosted many events. Apart from the Formula 1 Grand Prix, a number of significant sporting events have been held here including the TCR International Series, the F4 NEZ Championship, the Russian Circuit Racing Series, the Max Power Cars and the Porsche Club Cup motorsport competitions, the Russian Triathlon Cup Final, the Mazda Sport Cup 2014 Final, the Sochi Half Marathon, the Russian Formula Masters (Formula 3 class) and the International race of the MiJet 2L series

Educational Projects

Sochi Autodrom recruited over 1,000 volunteers from 19 countries of the world and different regions of Russia to host the Grand Prix and thus made a considerable contribution to the volunteers' movement development. Within the framework of cooperation with the Russian International Olympic University, its students, who are enrolled in the sports management programme, followed a traineeship at Sochi Autodrom. Professors of the University of Bolton and the Moscow State Automobile & Road Technical University (MADI) visited Sochi Autodrom to discuss possibilities of interaction with the Russian Grand Prix promoter in the field of staff training for motorsport competitions' organisation.

Commercial Services

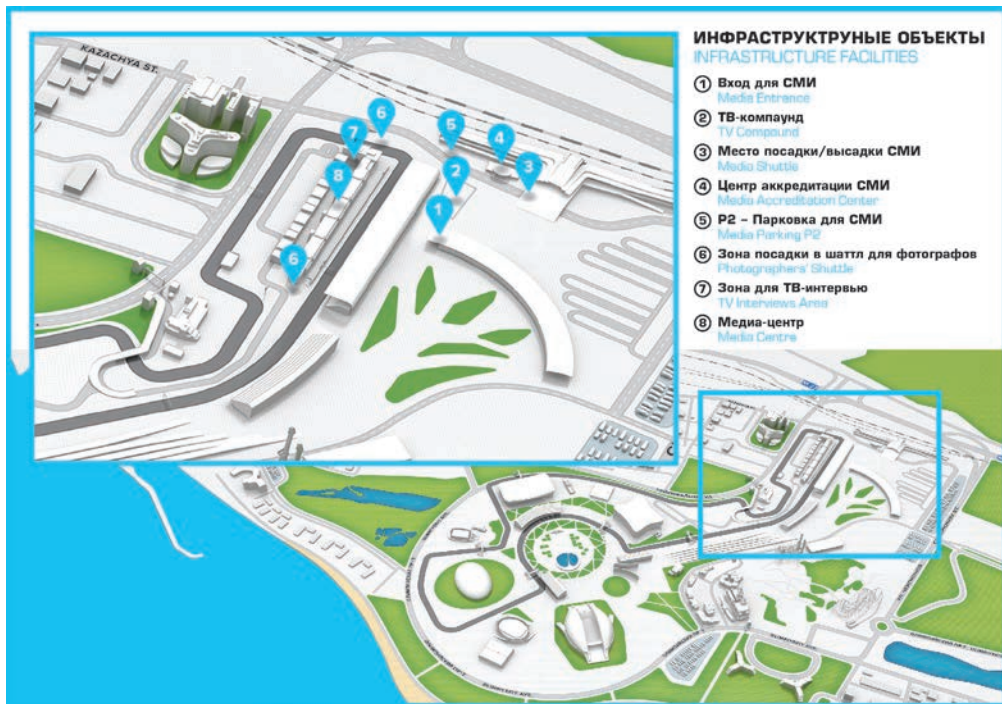

The Autodrom's circuit allows it to host open track days, where motorsport fans get the opportunity to test the Formula 1 track for themselves. The Sochi Autodrom's team of professional drivers offers every visitor 'taxi rides' around the circuit. As part of regular venue tours, everyone also has a chance to visit the Race Control building; the team boxes and buildings, the Paddock Club and the VIP lounge.

Sochi Autodrom is also actively used as a site for corporate events. Companies are offered spacious rooms to hold press conferences, new product presentations and business meetings of all levels. Sochi Autodrom is ready to offer interesting sponsorship packages and an attractive advertising space to potential partners.

2016 FIA FORMULA ONE WORLD CHAMPIONSHIP

NEW RULES IN 2016

Exhaust Layout - Teams must now use separate exhaust pipes for the wastegate and turbine instead of the single exhaust used in 2015, which is to improve engine noise. The rules also allow the use of a twin pipe for the wastegate although any exit must not be in excess of 100mm from the main pipe.

Power Unit Allowance - As the number of championship rounds has increased from 19 to 21, each driver is allowed to use up to five power units over the course of the season. As a result, grid penalties will only be activated when each driver uses a sixth of any one of the six disparate power unit elements.

Power Unit Development - Manufacturers will be allowed 32 power unit tokens for use in-season development, which can be used at their discretion. Where previously no manufacturer could supply more than one specification of power unit, engines homologated in previous seasons, may again be re-homologated for use in the 2016 season.

Cockpit Safety - Head protection structures either side of the cockpit have been increased by 20mm and are now able to resist a compression load of 50N per 30 seconds.

Tyres - Pirelli are now making three of their five dry-weather tyre compounds, which includes the new purple-market ultra-soft, available for use at each event. This is to encourage variation between race strategies. The company will allocate two sets of tyres for each race, of which only one set must be used. One set will also be allocated, the softest of the three compounds for Q3 only. Each driver will then choose 10 further sets of tyres from the three compounds, which would take their weekend allocation to 13.

Virtual Safety Car – VSC. The VSC may now be used in practice as well as races in order to reduce stoppage times, while the DRS will be re-enabled immediately after a VSC period.

Accident Analysis - In order to gather information and analyse accidents each car will be fitted with a high-speed camera and drivers must wear in-ear accelerometers at each event and any tests that are attended by more than one team.

Testing - The number of pre-season tests has been cut from three to two, which means that teams may participate in eight days of track running rather than the twelve days in the previous season.

Melbourne's Albert Park remains one of the most popular circuits with fans on the F1 calendar, offering a combination of long straights, sweeping curves and tight chicanes make it a welcome challenge for the drivers. The Australian Grand Prix is this season's first round of the Formula 1 Championship, having held this distinction each year since the event moved to Melbourne in 1996, excluding 2006 and 2010.

The Circuit de Catalunya was built in 1989 through the efforts of a Consortium composed of the Catalan Government, the Reial Automòbil Club de Catalunya (RACC) and the Montmeló Town Council. In September 1991, the 35th Spanish F1 Grand Prix was held following a seventeen-year of absence in Catalonia. Today, the circuit is a familiar site for teams and drivers as the track is used for extensive offseason testing.

Monaco remains one of the most prestigious auto races in the world, long recognized for its entertainment and celebrity presence. Motorsports most famous street circuit takes six weeks to build up and organize, offering drivers with the challenge of negotiating numerous elevation shifts and very tight corners, including one of the slowest corners in F1 racing as well as one of the fastest. Due to its unique configuration, change in speeds and lack of straights, keeping the engine cool is a point of focus for the teams, as Formula One cars depend on air moving over the car to remove heat, and don't use formal cooling technology.

2016 FORMULA 1 GRAND PRIX OF EUROPE

BAKU

Date	17 – 19 June	Race distance	306.051 km
Circuit length	6.001 km	Number of laps	51

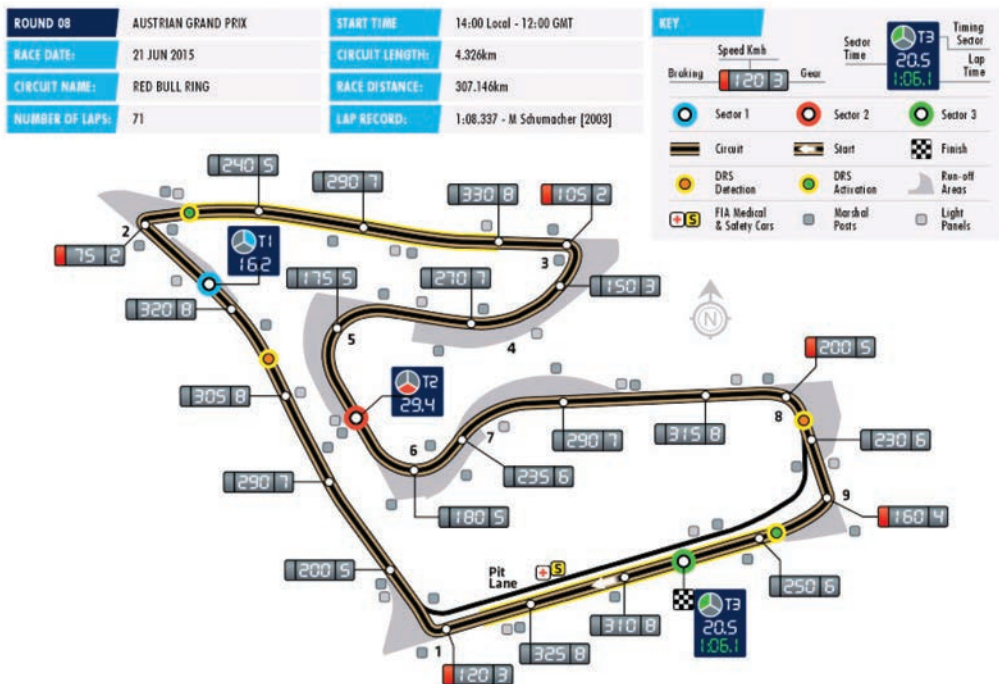

The six kilometers, anti-clockwise layout of the circuit was designed by circuit architect Hermann Tilke. The circuit is planned to start adjacent to Azadliq Square, then loop around Government House before heading west to Maiden Tower. Here, the track is planned to have a narrow uphill traversal and then circle the Old City before opening up onto a 2.2 km (1.4 mi) stretch along Neftchilar Avenue back to the start line.

CIRCUIT LENGTH:	4.574KM
RACE DISTANCE:	306.458KM
LAP RECORD:	1:13.780 - K Raikkonen [2004]

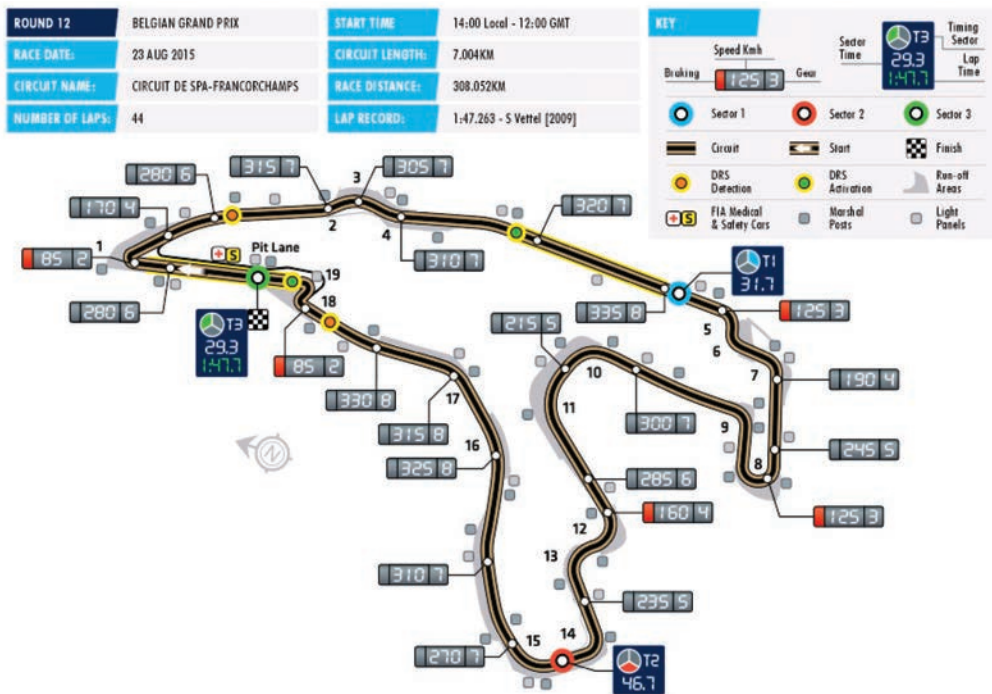

The Hockenheim Circuit hosted the German Grand Prix since 1970 when the F1 drivers decided to boycott the usual host circuit the Nürburgring, unless major modifications were implemented. From 1977 to 2006, the Hockenheimring hosted the German Grand Prix with the lone exception being 1985. Since 2007, the Circuit alternates as a host of the German Grand Prix with the reconfigured Nürburgring.

2016 FORMULA 1 BELGIAN GRAND PRIX

SPA - FRANCORCHAMPS

Date	26 – 28 August	Race distance	308.052 km
Circuit length	7.004 km	Number of laps	44

The Circuit de Spa-Francorchamps is legendary among race enthusiasts for its long-standing history and unique setting. It is considered one of the most challenging tracks in the world, mainly due to its fast, hilly and twisty layout within the Ardennes Forest. The circuit tests driver skills especially when trying to negotiate the Eau Rouge and Blanchimont corners. Designed originally in 1920, Spa-Francorchamps also plays host to a range of other race series including the Spa 24 Hours endurance race.

The Marina Bay Street Circuit plays host to the Singapore Grand Prix, Formula One's first ever night race. Given its city setting, the circuit is popular with fans and teams for its easy access, allowing many of the drivers and engineers to simply walk from their hotels to the circuit. Drivers must negotiate tight racing lines, adjust to driving at night under a vast and sophisticated lighting system, and ensure their fitness to deal with the high levels of humidity.

2016 FORMULA 1 PETRONAS MALAYSIAN GRAND PRIX

SEPANG

Date	30 Sep – 02 Oct	Race distance	310.408 km
Circuit length	5.543 km	Number of laps	56

Sepang remains one of the most technically challenging circuits in Formula 1, while testing the stamina of the drivers owing to its high humidity and potential for rainstorms that could alter team strategy. Consideration has been given to introducing a floodlight system, which would allow the race to be run at night. However, to date, the race has a later afternoon start date.

With its first race in 2015, the Autodromo Hermanos Rodriguez circuit is situated in the center of Mexico City and has not held a Formula One Grand Prix since 1992. This race was won by Nigel Mansell for the Williams Renault Team. The facility has been comprehensively upgraded, while the entire track was resurfaced for the occasion and changes made to a number of corners including Peraltada.

2016 FORMULA 1 GRAND PREMIO DO BRASIL

SAO PAULO

Date	11 – 13 November	Race distance	305.909 km
Circuit length	4.309 km	Number of laps	71

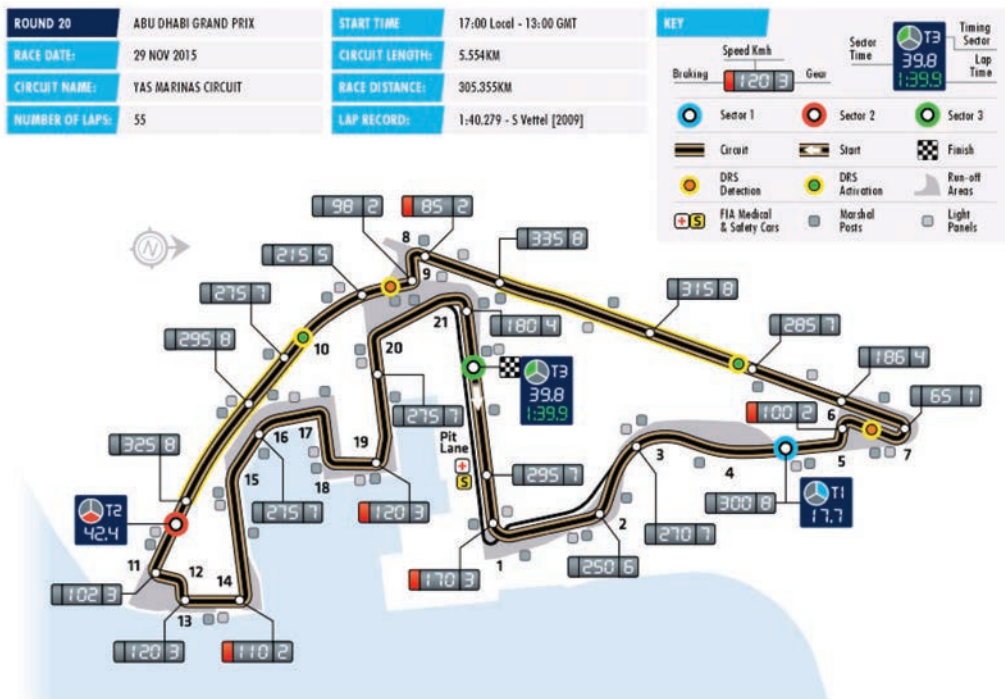

Located in Sao Paulo, Interlagos includes the Autodromo Jose Carlos Pace, home to the Brazilian Grand Prix. The Interlagos circuit has played host to some of the most exciting and memorable races in recent Formula One history, including Lewis Hamilton winning the World Championship on the last lap of the 2008 race. Regarded as one of the most challenging circuits on the Grand Prix calendar, Alain Prost still holds the record with six victories in Brazil.

2016 FORMULA 1 ETIHAD AIRWAYS GRAND PRIX

YAS MARINA

Date	25 – 27 November	Race distance	305.355 km
Circuit length	5.554 km	Number of laps	55

The Abu Dhabi Grand Prix located on Yas Island, is Formula One's first ever day-night race, with a local start time of 17:00. Floodlights are activated from the start of the race to provide a transition into the evening. It has been the last race of the calendar for the past 2 years.

SMP F4 NEZ Championship

SMP F4 NEZ Championship - certified by FIA - will start its second year in the Formula One Russian Grand Prix in Sochi.

After an explosive first season which saw it's winner Niko Kari entering the FIA F3 European Championship thanks to the SMP F4 NEZ prize money of €350.000, and the Red Bull Junior team, the North European Zone Championship is ready to kick off together with the highest category in the discipline at Sochi Autodrom.

The SMP F4 NEZ Championship is a mono series promoted by Koiranen GP with the aim of leading the young driver generation to the higher steps of the FIA ladder. The drivers can start the new FIA category from 15 years old, straight after karting. It's a come-and-drive type of series, which enhance fairness and equality, as all the cars are serviced and kept by the Championship. During each round of the SMP F4 NEZ Championship the drivers have classes in different subjects, varying from Regulations, Marketing, Communications, Mechanical skills, Engineering basics, to Sponsoring, with the aim to help them to prepare their career.

The 2016 season will consist of seven rounds including Sochi, to Zandvoort in the Netherlands for two events, then Moscow for two other rounds - including one event with the DTM, then the series will discover Anderstorp, Sweden and end its second year in Ahvenisto, Finland.

The SMP F4 NEZ Championship is the unique Series to reward the Winner with a full season in the FIA F3 Championship as the goal is to enable talent to get the drivers to the top. The best rookie of the season will get a prize of €100,000 towards the SMP F4 NEZ Year 3, F4 Spain or GP3 Series.

The SMP F4 NEZ Championship will feature two races in Sochi, one on Saturday at 4:30 pm and Sunday at 12:30am!

Mitjet 2L Arctic Cup

For the first time in history the Mitjet 2L Arctic Cup was authorised to become a support race to the 2016 FORMULA 1 RUSSIAN GRAND PRIX which will be held on 29th of April to 1st of May at Sochi Autodrom. The Mitjet 2L Arctic Cup weekend will consist of two 20 min races, one on Saturday afternoon and the second on Sunday morning. Both races will be broadcast live on TV.

The Mitjet Series Russia had only a one-year period to demonstrate and prove its capability. In 2015 MSR organized 13 rounds. Typically, 49 drivers participated (31 driver in the PRO category and 18 drivers in the Semi-PRO category).

The Mitjet Endurance race, in December 2015, was the first Endurance event held in the history of Sochi Autodrom - with various drivers, such as multiple Russian circuit racing Champion Boris Shulmeyster, ELMS GT3 Champion David Markozov, FIA WEC GT2 Champions Sergey Zlobin and Alexey Basov, ex GP3 driver Ivan Lukashevich, rally drivers brothers Nikolai and Vasilii Gryazin, young formula drivers and serious businessman taking part.

While the support race to the 2016 FORMULA 1 RUSSIAN GRAND PRIX is a standalone event, the Mitjet 2L Russian Cup starts its season of 7 weekends with 2 races at Sochi Autodrom on 21st-22nd of May.

The Mitjet Series Russia is based at Sochi Autodrom. In addition, we have the constantly operating professional Arctic Energy Racing School, headed by an acknowledged expert - Boris Shulmeyster.

The Mitjet Series motto is: "Race for all!". Mitjet 2L specs - tubular frame, plastic body, 2.0L 16V 230 HP engine, 6-gear sequential gearbox, rear wheel drive, 750 kg weight and 255/40 R18 semi slick tyres - is built safe and simple, to give all control into the drivers hands - with no possible influence from the team or the budget. This makes for pure racing and a huge "spectacle" for the spectators on the race track.

Class Mitjet 2L was born in France in 2012 with 16 cars on the grid. Now, in 2016, this class is already well known in France, Italy, Denmark, Russia and the USA with up to 40 cars on the grid - where among participants you can meet world famous drivers Sebastien Loeb (9-time World Rally Champion), Yvan Muller (4-time WTCC champion), Olivier Panis (Ex F1 driver) and more. The co-founder of the Mitjet Series is a famous French racer, Jean-Philippe Dayraut.

SOCHI TRAVEL INFORMATION

HOW TO GET TO SOCHI AUTODROM

Sochi Autodrom is approximately 30km away from the centre of the city of Sochi, 10km away from Adler Railway Station, 10km from Sochi International Airport and 50km from Krasnaya Polyana.

As an integral part of the Olympic Park, Sochi Autodrom helps to emphasize the specific features of this magnificent complex. The unrivalled architecture of the many Olympic venues, the splendid view of the Black Sea and the snow-capped Caucasus mountains create a unique atmosphere around the circuit that is accentuated to an even greater extent on race days. The well-developed transport network and infrastructure, proximity of modern hotels and the entertainment park make Sochi Autodrom an attractive tourist destination.

SOCHI TRAVEL INFORMATION

SOCHI AT A GLANCE

Sochi is one of the southernmost regions in Russia and the second-largest city in the Krasnodar region. Located along the Black Sea coast, it is approximately 1,600km (995 mi) south of Moscow. The city has a permanent population of 401,291 (2016) and Greater Sochi (includes four administrative districts: Central Sochi District, Lazarevskoye District, Khosta District, and Adler District) has 480,215 residents, making it Russia's largest resort city.

Sochi is often unofficially called the 'Summer Capital' of Russia, or the Black Sea Pearl. Sochi is the biggest and busiest summer sea resort in Russia, attracting more than four million visitors annually with its amazing mountainous coastline, endless shingle beaches, warm sunny days, and bustling nightlife. From May to September Sochi's population at least doubles with tourists, including celebrities, and the political elite of the country visiting the region

Sochi belongs to a tiny part of Russia, which is located in the subtropical climatic zone. Sochi enjoys around 300 sunny days a year, which is unbelievable for Russia and only exceeded by the adjacent Krasnodar region coastal cities. This makes Sochi an ideal place to visit all year-round.

Greater Sochi occupies 145km along the Black Sea coastline. Its total area is 3,500km² (2,175 sq. mi) - three times larger than Moscow. However, most of the population is spread along the narrow coastline stripe, while the mountain area (1,900km²/1,180mi²) mostly belongs to Sochi National Park and partly to the Caucasian Biosphere Reserve. The city alignment is from north-west to south-east, from the neighboring city of Tuapse right to the Russian border with Abkhazia.
