

Go karting
can be learnt at
school !

Our schools were created in 2007 by the FFSA

Our aims

- To teach the basics of go kart driving
- To make go karting accessible
- To teach the values and basic rules of go karting

There are **38** schools in France

We had 1000 people registered in 2013 which shows a huge increase since 2007.

**From the
opening
of the school
to the reception
of trainees**

In order to open a school for the reception of trainees and to qualify for the status of an EFK school, you have to respect certain specifications :

- To have an approved circuit
- To have teachers with a State diploma
- To have the adequate operational infrastructure
- To have go karts and the essential accessory equipment

The tools provided by the FFSA for each EFK School :

6 minikarts per school

Merchandising

A system for disabled drivers

**What do *young*
drivers learn ?**

The young driver acquires the following skills :

- How to drive a go-kart (installation, avoiding an obstacle, overtaking,...)
- Track safety and regulations (equipment, flags, race start, official's mission...)
- Road safety and regulations
- Mechanical skills (tyre pressure, settings,...).

Each driver has a personal course book including :

- Information on karting
- Safety equipment (circuit and road)
- The rules to be respected (circuit and road)
- Mechanical and other detailed images of the kart
- Flags
- Assessment levels
- Teacher's observations.

The teacher has an "Instructor Manual" including :

- Course exercises
- Assessment exercises.

Since 2011, two seminars have taken place in the Auto Sport Academy to teach new pedagogic skills for teachers and these will continue every two years.

Last year, one of our partners (the Paris Police Department) came to Le Mans to give some details about road safety.

To evaluate the progress of each driver, there are four levels :

- First steering wheel
- Bronze steering wheel
- Silver steering wheel
- Gold steering wheel

If they pass their tests and qualify, the young drivers receive a diploma and a badge

These qualifications may be required for competition

FFSA

After lessons ...

Different solutions can be envisaged for the drivers development and progress :

- Local races (with the regional representation of the FFSA)
- National races

Some schools create racing teams with coaches.

This year the FFSA has launched the Kart Racing Academy which is the first concept of competitive practice for young people from 7 to 15 years old. Where everything except the helmet is provided (the kart, suit, shoes, gloves, registration).

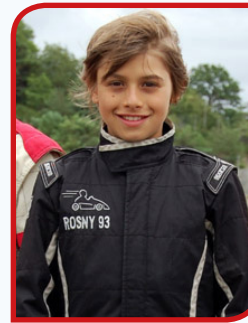

Our budding EFK drivers

Adeline PRUDENT

(16 years old)

- The CIK FIA Academy Trophy
- Women in Motorsport - Peugeot RCZ Cup

Xavier DIAS

(12 years old)

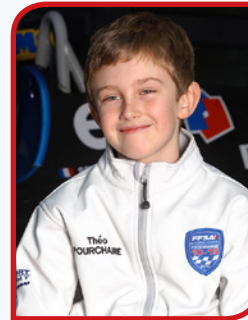

- The FFSA 10 to 15 years old programme

Nathan HEDOUIN

(13 years old)

- The CIK FIA Academy Trophy
- The FFSA 10 to 15 years old programme
- French Champion Cadet 2012

Théo POURCHAIRE

(10 years old)

- The FFSA 10 to 15 years old programme
- French Minime Champion 2013

**What are the
ways to develop
this network ?**

Since 2012, each year, a final between the different schools has been organized. The aim is to determine the best school of the year through different tests.

Each school presents three drivers (6 to 11 years old) for a one-day event :

- 1- In the morning, different tests : slalom, quiz, free practice : 50% of the final grade
- 2- In the afternoon, races : qualification, finals : 50% of the final grade

FFSA 

The FFSA organize different shows to demonstrate go karting and the activity of our schools : a roadshow with The Walt Disney Company, a demonstration during the ERDF Masters Kart in Paris Bercy, Kidexpo, Paris Plages, etc.

OUR PARTNERS

The police for road safety

First aid

Children's press and media

A balanced diet

A foundation for childhood

COMMUNICATION

- Advertisements in different newspaper and magazines
- A website with games and information about the network
- Press releases
- Newsletters on the web and by email to different schools
