

FIA Formula E Championship

The FIA Formula E Championship is the world's first fully-electric racing series. It is designed to appeal to a new generation of motor sport fans, whilst helping to promote the electric vehicle industry and act as a test bed for new technology. Racing entirely

on street circuits, it uses all electric single-seater cars capable of speeds in excess of 225kph. Ten teams, each with two drivers, will compete in one-hour races with the first of 10 races beginning in Beijing on September 13 2014, with the season finale in London on June 2015.
