## 2. Amendments to the FIA Motorsport Games 2024 Cross Car Sporting Regulations:

### 11.1 Start

(...)

11.1.1 ~~Start Procedure: the start procedure begins with showing a "5 seconds" board. After this, the start will be given when the green light is switched on.~~ **Start Procedure: the start procedure begins when a "READY TO RACE" Sign on a light panel is turned on. After this, the start will be given when the green light is switched on.** There must be an electronic system for each start line and there must always be a margin of 15cm +/- 5cm between the electronic system (or the start line) and the car.

The use of a camera recording the starts is obligatory. It must be pointed towards the starting grid and record all the cars and the starting lights at the same time. The timing will be by electronic beams, to one hundredths of a second at least.

A "Mylaps X260" "Mylaps car" or "X2 Transponder car" type transponder system will be used, installed on the front righthand side of the car when the car is facing forward. The Driver must procure his own transponder.

The start will be given only after the system for detecting false starts has been initiated.
