temperatures.

Tyres may only be heated prior to the session in which they are intended to be used.
The temperatures apply at all times during the event.

| Tyres notes | | | | |
|---|--|--|--|--|
| Not permitted to switch tyres from their originally allocated position. | Heating time temperature limits apply to the actual tyre surface | | | |
| • Do not subject tyres to large deformation or heavy impact. | temperature measured with the IR gun as detailed in the TD003 | | | |
| • Do not leave fitted tyres exposed at an air temperature lower than 10°C and/or any excessive UV emission. | Cold cooling curve temperature limits apply to the tyre side wall temperature measured with the probe as detailed in TD003 | | | |
| Revised prescriptions could be issued during the race weekend in accordance with TD003. | BLANKET HEATING TIME for each temperature range to be counted from | | | |
| • Cut-off time for fitting tyres at an event on sunday morning: 4 hours prior to the race start | the moment the blanket control unit is set to reach its targeted temperature within its correspondent interval. | | | |
