2023 AUSTRIAN GRAND PRIX

30 June – 02 July 2023

From	The FIA Formula One Race Director	Document	14
To	All Officials, All Teams	Date	30 June 2023
		Time	13:40

EVENT NOTES V2 (Changes in light blue) General Instructions

1) Track light panels

The FIA track light panels have been installed in the positions shown on the circuit map. In accordance with Appendix H to the ISC the light signals have the same meaning as flag signals.

2) Drivers leaving their pit stop position in the pit lane

For safety reasons, no car should be driven from its pit stop position at any time unless:

- It has first been driven into the pit stop position having just entered the pit lane from the track, and;
- It is then driven immediately back onto the track from the pit stop position.

3) Observing yellow flags

- 3.1 Single waved: Drivers reduce their speed and be prepared to change direction. It must be clear that a driver has reduced speed and, in order for this to be clear, a driver would be expected to have braked earlier and/or discernibly reduced speed in the relevant marshalling sector.
- 3.2 Double waved: Any driver passing through a double waved yellow marshalling sector must reduce speed significantly and be prepared to change direction or stop. In order for the stewards to be satisfied that any such driver has complied with these requirements it must be clear that he has not attempted to set a meaningful lap time. Furthermore, during qualifying and sprint shootout any driver in a double yellow sector will have that lap time cancelled.
- 3.3 Double Waved during VSC or SC: Any driver passing through a double waved yellow marshalling sector during a VSC or SC, in addition to the requirements in 3.2 above, must remain positive of the SECU delta time in the sector concerned.

4) Laps during Qualifying, Sprint Shootout and Reconnaissance Laps

- 4.1 In order to ensure that cars are not driven unnecessarily slowly on in laps during and after the end of qualifying, Sprint Shootout or during reconnaissance laps when the pit exit is opened for the sprint or the race, drivers must stay below the maximum time set by the FIA between the Safety Car lines shown on the pit lane map.

Teams and Drivers will be informed of the maximum time after the first practice session.

5) **Article 55.14**

“In order to avoid the likelihood of accidents before the safety car returns to the pits, from the point at which the lights on the car are turned out drivers must proceed at a pace which involves no erratic acceleration or braking nor any manoeuvre which is likely to endanger other drivers or impede the restart”.

6) **Parc Fermé**

- 6.1 The Parc Fermé cameras must be always uncovered and operational during the Event.
- 6.2 No more than three (3) team personnel per car are permitted into the Parc Fermé area for the sole purpose of fitting cooling fans and any work required by the FIA.

7) **Lapping during the sprint and the race**

The ISC requires drivers who are caught by another car to allow the faster driver past at the first available opportunity. The F1 Marshalling System has been developed in order to ensure that the point at which a driver is shown blue flags is consistent, rather than trusting the ability of marshals to identify situations that require blue flags.

The system will be set to give a pre-warning when the faster car is within 3.0s of the car about to be lapped, this should be used by the team of the slower car to warn their driver he is soon going to be lapped and that allowing the faster car through should be considered a priority. When the faster car is within 1.2s of the car about to be lapped blue flags will be shown to the slower car (in addition to blue light panels, blue cockpit lights and a message on the timing monitors) and the driver must allow the following driver to overtake at the first available opportunity.

It should be noted that the aim of using F1MS is ensure consistent application of the rules, additional instructions may also be given by race control when necessary.

8) **Article 19.4**

In accordance with the provisions of Article 19.4 a), upon permission given by the Technical Delegate, it is considered acceptable to connect the umbilical to the cars and close the HV contactors (TR 5.26.5) for the sole purpose of checking the car ERS safety status, during the pre-race car display period.

Event Specific Instructions

9) **Formula 1 Sporting Regulations Article 23.1**

In accordance with the provisions of Article 23.1 b), this Event is an Open Event.

10) **FIA Outside Scales Times**

Should the outside scales be set-up at the pit-lane entrance, these will be available for teams to use at any time outside the curfew times and the Parc Fermé cover-up times, except for the 30 minutes

preceding the start of the Qualifying session and Sprint shootout and if there are support competitions using the pit lane.

11) Specific Technical Procedures

Please note that the FIA have introduced an Appendix Index File which contains all the relevant and active Appendix documents, Technical and Sporting Directives. The latest version of this Index file (“2023 Formula 1 Appendix – iss 3 – 2023-05-12.xlsx”) and all relevant documents can be found on the FIA SFTP site.

Competitors are hereby required to ensure compliance with these directives for the safe and orderly conduct of the Event.

12) Support Races team barrier placement and Movements

Team barrier placement prior to and during all support category practice sessions and races: No more than (2) two meters from the garages.

It is not permitted to push cars to or from the weighing area at any time a support category is in the pit lane.

Support Crews and Trolleys will be released into Pit Lane no earlier than 20 minutes prior to the opening of Pit Exit for their respective sessions.

Support Category competition vehicles will be released from the marshalling area no earlier than 15 minutes prior to the opening of Pit Exit for their respective sessions.

13) Testing of Double Yellow Flag Delta during VSC after Free Practice

After all cars have taken the chequered flag, a Double Yellow Sector will be activated followed by a preceding Single Yellow Sector. Approximately after 10 seconds VSC will be activated. This will be active until all cars returned to the pit lane after carrying out their practice starts.

14) Positioning of the car on track during Free Practice, Qualifying and Sprint Shootout

To help mitigate any differences in speed, cars on out or slow laps are requested to stay clearly offline where possible between Turns 6 and 9.

15) Practice starts

15.1 No practice starts may be carried out at the pit exit.

15.2 For reasons of safety and sporting equity, cars may not stop in the fast lane at any time the pit exit is open without a justifiable reason.

15.3 Practice starts may be carried out on the track at the end of the free practice session. Any car on the track when the chequered flag is shown may then complete another lap and, instead of entering the pits, proceed to the grid and carry out a practice start.

15.4 All drivers carrying out a practice start must do so by pulling as far forward on the grid as possible and, if necessary, should wait for others to carry out a start before getting to a grid position further forward. Under no circumstances should a driver make a practice start if another car is still stationary in front of him on the same side of the grid.

15.5 If any driver appears to be disregarding any of the above a red flag will be displayed and the possibility to carry out any further starts will be immediately terminated.

16) Lines at the Pit Entry and Pit Exit

In accordance with Chapter 4, Article 4 and 6 of Appendix L to the ISC drivers must follow the procedures at pit entry and pit exit.

For safety reasons drivers committed to entering the pit lane, must keep to the right of the white line preceding the pit entry which starts approximately 50m before turn 9.

Except in cases of force majeure (accepted by the Stewards), the crossing by any part of any wheel, in any direction, of the white line prior to the pit entry or of the painted area, between the pit entry and the track, by any driver who, in the opinion of the Stewards, had committed to entering the pit lane is prohibited.

17) DRS

DRS Detection will be automatically disabled in each individual zone if any of the light panels in that particular zone are displaying yellow. The zones and corresponding light panels are as follows:

- a) DRS Activation 1: Panels 3, 4, 5, 6
- b) DRS Activation 2: Panels 7, 8, 9
- c) DRS Activation 3: Panels 16, 1, 2

18) Track Limits

In accordance with the provisions of Article 33.3, the white lines define the track edges. During Qualifying, Sprint Shootout, Sprint and the Race, each time a driver fails to negotiate with the track limits, this will result in that lap time being invalidated by the Stewards. Additionally, each time a driver fails to negotiate with the exit of turn 10, will result in that lap time and the immediately following lap time being invalidated by the Stewards.

19) Fire extinguishers around the circuit

Indicated by white boards with a red fire extinguisher image attached to the debris fences.

20) Places to remove cars from the track

Indicated by fluorescent orange panels/paintings on the barriers.

21) Removing cars from the grid

Cars will be removed through the two gates in the pit wall adjacent to grid position 1 and 12.

22) Race Suspension

22.1 In case of a race suspension, cars will be stopped in the fast lane in front of the pit exit lights.

22.2 The following procedure for resuming a race with a standing start procedure will apply for the Race in Spielberg:

- 10 Minutes Signal
- 5 Minutes Signal
- 3 Minutes Signal
- 2 Minutes - lapped cars will leave the pit lane to complete one lap and return to the pit lane
- 1 Minute Signal
- 15 Seconds Signal
- Pit exit green light - SC will leave the pit lane with its lights on, lights will be extinguished after 1 second.

- **30 Seconds** after the SC has left the pit lane, all drivers leave the pit lane and proceed to the grid without overtaking.
- Standing Start Procedure

23) **Car number light panels for the start**

On the right-hand side of the grid. **Team equipment must stay clear off the panels to avoid any damage.**

24) **Guest access to the grid**

For the start of the sprint and the race and after the end of the sprint and the race, teams are responsible to ensure that guests do not cross the teams' garages and access the pit lane before all cars are on the grid or have reached Parc Fermé.

25) **Changes to the Circuit**

- New verge between Turn 2 and Turn 3 on both sides, same width as before.
- Verge behind 2nd kerb shortened at the apex of Turn 8 on RHS.
- Temporary kerbs at Turn 8 on RHS have been removed.

26) **Tyre Usage**

In order to avoid the acknowledged unintended consequence whereby in certain situations at Sprint events it becomes attractive to run intermediate tyres on a dry track, the following amendment to Article 30.5.h of the Formula 1 Sporting Regulations is made.

Consultation has occurred with the Commercial Rights Holder, Stewards and Teams.

The agreement of the FIA, the Commercial Rights Holder and ~~nine (9)~~ all Competitors has been obtained in accordance with Article 1.4.

Accordingly, my Decision is that Article 30.5 h) iv) be modified to read as follows:

Article 30.5h iv revised wording

*In the period SQ3 of the sprint shootout, up to one set of dry-weather tyres may be used, and this must only be a **new** set of the soft specification.*

Article 1.4 for ease of reference

Until 01 August 2023, for Competitions where a sprint session is scheduled, and in exceptional circumstances only, the FIA may implement temporary changes to Articles 30.5.h, 37.4, 39, 40.9, and 42 of these Sporting Regulations. Any such changes:

- a) May only be made with the agreement of the FIA, the Commercial Rights Holder and at least eight (8) Competitors;

- b) Must address unintended issues that have arisen as result of the changes to these Sporting Regulations approved by the WMSC in April 2023;
- c) Must be solely intended to ensure sporting fairness or to avoid organisational issues;
- d) May only apply at the Competition during which the matters in question arose; and
- e) Will be communicated to the Competitors via the Competition Notes issued by the Race Director.

Niels Wittich

The FIA Formula One Race Director
