### Technical Delegate's Report

#### **After Race 1:**

The skid plank of car #24 was found with a maximum thickness of 3.6 mm on one of the plank scrutineering holes. This is not in line with Art. 4.2 of the FIA Formula 2 Championship Technical Regulations.

The front and central parts of the plank fitted under the bodywork facing the ground must have at all times a thickness of 5mm +/- 1mm. In order to establish the conformity of the plank after use, its thickness will only be measured in a single position around the periphery of each of the original plank scrutineering holes.
