Date	:	18 July 2025	Pages	: 1

Subject	:	Update of Hologram logging procedure
----------------	---	--------------------------------------

We are writing to inform you of an important update to the logging procedure of holograms.

New hologram logs provided, must from now on be used for logging the production data.

In July 2025, FIA will still accept the old log format – starting from January 2026, the new format is mandatory.

Please find below the key changes concerning this update:

1. Extended Submission Deadlines
Previously, logs were to be submitted twice a year – by January 15th and July 15th. These deadlines have now been extended to:
 - January 31st – for production corresponding from July 1st to December 31st of the previous year
 - July 31st – for production corresponding from January 1st to June 31st of the present year
2. Updated Submission Email
All log files should now be submitted to: hologram.logs@fia.com
3. Revised Templates and Submission Format
 - Instead of different templates for each standard – we are introducing two templates for all standards.
 - The manufacturer may choose either template, depending on their preference.
 - Manufacturers should consolidate hologram log data from all standards into a single log file.
 - Alternatively, it is acceptable to submit two separate files (one for individual logs and one for serial logs), if preferred.
4. Logging guidelines
 - Guideline document ensuring the data is entered correctly

Attached to this message are the following updated resources:

- [Log_SE_individual.xlsx](#)
- [Log_SE_serial.xlsx](#)
- [Logging guidelines document](#)

We remain at your disposal for any further information you may require
Thank you for your attention to this matter.
