Dear members of the media,

Welcome to the Miami International Autodrome and the FORMULA 1 CRYPTO.COM MIAMI GRAND PRIX 2023. On behalf of the whole team at South Florida Motorsports (SFM), we hope that you enjoy your visit to the city of Miami and are as excited as we are for the on-track action to begin.

This weekend marks the first of three Formula 1 races to be held in the United States this year, highlighting the incredible popularity of the sport here at the present time.

Twelve months ago, we hosted our first-ever Formula 1 Grand Prix and it was an unforgettable occasion. From the Wednesday night Opening Party on the podium at Hard Rock Stadium, to the action-packed 57 laps on race day, the whole weekend gave us a chance to showcase the vibrancy and culture of Miami to the world.

Since our inaugural race, we have worked tirelessly to make this 2023 event even better in our pursuit to deliver a best-in-class experience for all - drivers, teams, fans and media alike.

We have invested significantly in all areas, including a full track repave and the construction of a brand-new permanent Paddock Club structure – complete with rooftop terrace. In addition, we have added new luxury spaces throughout the Campus, increased grandstand capacity to 56,000 and updated the Campus Pass, adding elevated trackside viewing platforms to give more fans the opportunity to enjoy the incredible spectacle of the FORMULA 1 CRYPTO.COM MIAMI GRAND PRIX 2023.

Working with over 65 of the best restaurants in South Florida, we have also expanded and enhanced many of our marquee features around the Campus to welcome back guests to sample our premium offerings, including the Yacht Club, MIA Marina and Hard Rock Beach Club.

We have also made changes to the Formula 1 paddock, moving the teams' hospitality units to the football field of Hard Rock Stadium to create an all-new Team Village – which all ticket holders can now experience from above from the 300 level. The remaining areas of the paddock have also been reimaged to incorporate the culture of Miami through art, design as well as food and beverage offerings, which we hope you take time to enjoy amongst the busy working days.

At the heart of our event is the local community and our economic impact report's findings revealed that last year's race boosted the local economy to the tune of \$350 million. We continue to work closely with the residents of Miami Gardens, in both educational programs, internships and employment to positively engage the local community.

In everything we do, we are committed to providing an unparalleled experience for everyone who attends the Miami International Autodrome for this year's race. Thank you for your attendance and enjoy the weekend.

1.4 MIAMI - TRAVEL GUIDE

1.4.1 GREATER MIAMI & MIAMI BEACH SIGHTS & ATTRACTIONS - OVERVIEW

Tourism	https://www.miamiandbeaches.com/
Sand & Art Deco	For many, Miami Beach is the first stop to soak up the sunshine at iconic beaches, explore the Art Deco District near Ocean Drive and get a taste of South Beach's legendary scene, Mid Beach's glamorous resorts, and North Beach's laid-back vibe.
Explore Hip Enclaves	Just across Biscayne Bay, a different experience awaits when you explore Wynwood and the Miami Design District . Mural-splashed Wynwood is a hip, bustling neighborhood filled with buzzy restaurants, breweries, bars, and art galleries, while the Miami Design District is an upscale, alfresco shopping district with captivating public art and acclaimed fine-dining restaurants.
Arts & Architecture	The Downtown Miami/Brickell area is home to some of Miami's premier arts and cultural institutions, including the Pérez Art Museum Miami and the Phillip and Patricia Frost Museum of Science , which share a campus in Maurice A. Ferré Park overlooking Biscayne Bay. As you journey a bit further south, Coconut Grove and Coral Gables open to glorious architecture, lush tropical foliage, and one-of-a-kind attractions such as Vizcaya Museum and Gardens and the Venetian Pool .
Cultural Connections	Miami is also rich in Latin and Caribbean heritage. Visit Little Havana for a taste of Cuba, from the delicious fare at Versailles Restaurant to live music and salsa dancing at spots along Calle Ocho (Southwest 8 th Street). In Little Haiti , you can learn about Haitian culture among a hip, artsy crowd at the Little Haiti Cultural Arts Center and Caribbean Marketplace before heading out to a neighborhood gallery crawl. And Miami's Black heritage can be explored in Historic Overtown , whether it's at a performance at the Lyric Theater or breakfast at Jackson Soul Food .

3. 2023 FIA FORMULA 1 WORLD CHAMPIONSHIP™ - RULES & REGULATIONS

3.4 REVOLUTIONARY CHANGES IN FORMULA 1 IN 2023*

Following last season's revolutionary changes the 10 rule changes for the 2023 season include technical and sporting changes from cutting curfews to grid penalties:

1. Ride height and diffusers adjusted

With some teams encountering porpoising upon the arrival of F1's new-spec cars last year, which feature ground-effect aerodynamics, a set of floor-based flexibility and monitoring measures arrived for the second half of the 2022 season, and more have been outlined for 2023.

In short, four additional changes will come into play this year: floor edges have been raised by 15mm; the diffuser throat height has been raised; the diffuser edge stiffness has been increased; and an additional sensor has been mandated to more effectively monitor the porpoising phenomenon.

These adjustments should, in theory, make significant porpoising a thing of the past and, as such, keep the focus on the thrilling action that F1's rules reset has delivered.

2. Stronger roll hoops after Zhou's crash

Alongside the changes aimed at porpoising, there are tweaks to the safety standards for F1 car roll hoops after the frightening crash experienced by Zhou Guanyu at the start of the 2022 British Grand Prix, which involved his Alfa Romeo sliding along the track upside down.

The 2023 Technical Regulations now state that a rounded top is required on the roll hoop, which will reduce the chance of it digging into the ground during an accident, while they also ensure a minimum height for the point of application of the homologation test.

Additionally, there will be a new physical homologation test where the load pushes the roll hoop in a forward direction.

3. Revised mirrors to improve driver visibility

In an attempt to increase driver visibility, there will be a change to rear-view mirrors on F1's 2023-spec cars, with the width of the reflective surface increasing by 50mm from 150mm to 200mm.

Following tests by Red Bull and Mercedes in Hungary and Belgium respectively last season, the entire grid got involved at the Dutch Grand Prix, and the changes have now been written into the regulations.

4. Double the number of Sprint events

An exciting development for 2023 sees the number of Sprint events doubled from three to six. Azerbaijan (Baku), Austria (Red Bull Ring), Belgium (Spa-Francorchamps), Qatar (Lusail), the United States (Circuit of The Americas) and Sao Paulo (Interlagos) are the venues chosen, following on from extensive research into their suitability. Meanwhile, Sprint accident damage allowance will now be a fixed amount per team, for each race weekend that includes a Sprint session. The forfeit allowance amount for each Sprint will double to \$300k from 2023 onwards, while all other Sprint damage allowances will be removed.

Alongside this, parc ferme rules on Sprint weekends are under review for 2023, with the aim of simplifying the set-up-locking process, after the FIA cited a "significant increase in parc ferme requests" between Friday's qualifying session and Saturday's Sprint.

5. Paddock working hours cut

The number of hours worked by F1 team members across race weekends will be reduced in upcoming seasons, with the third of three restricted periods (effective on Fridays) beginning an hour earlier this year, and another hour set to be knocked off in 2024.

To complement the move, the number of curfews permitted for the first (Wednesday) and second (Thursday) restricted periods will also be cut in half, from eight to four and six to three respectively, again with another cut planned for next year.

6. Qualifying format and DRS trials

A 'Revised Qualifying Format' (RQF) will take place at up to two events in 2023 "for the purpose of evaluating whether the revisions are suitable for subsequent championships" - as per the updated regulations.

This will see tyre compounds mandated for each stage of F1's usual three-part qualifying session: hard tyres only in Q1; mediums tyres only in Q2; and, finally, soft tyres only in Q3. Intermediates and wets will be allowed if the RQF sessions are declared wet.

At RQF events, each driver may use no more than 11 sets of dry-weather tyres, four sets of intermediate tyres and three sets of wet-weather tyres. This compares to the normal weekend allowance of 13 sets of dry-weather tyres, four sets of intermediate tyres and three sets of wet-weather tyres.

As for DRS, its activation after the start, race restart or Safety Car restart will also be evaluated, with the F1 Commission exploring the possibility of bringing this forward by one lap at the start of a race or Sprint or Safety Car restart.

"This will be trialled during each Sprint session in 2023 with a view to introducing it for all races in 2024," the FIA have stated.

7. Tweaks around gearbox changes

While changes to teams' homologated gearboxes were only previously permitted "to resolve reliability problems" or "for cost saving, at the start of each season", modifications are now permitted "in the case of materials, processes or proprietary parts becoming unavailable".

Nonetheless, clear documentation justifying the change must be provided in all cases, prior approval must be obtained from the FIA, and the modification must not give any performance advantage. A summary of the modification will then be circulated to all teams by the FIA.

8. A move to clear up penalty confusion

Grid penalties came under the spotlight at last year's Italian Grand Prix, where a host of drivers took power unit and gearbox related drops and turned the order on its head. Following some confusion over how these were applied, the wording of the regulations has been updated.

The relevant section now reads: "Classified drivers who have accrued more than 15 cumulative grid position penalties, or who have been penalised to start at the back of

the grid, will start behind any other classified driver. Their relative position will be determined in accordance with their qualifying classification.”

9. More flexibility to cool fuel

A small change on paper could have an impact on reliability in 2023, particularly at hotter races, with some extra freedom being given to teams regarding the cooling of fuel.

For 2023, fuel in a car must not be colder than the lowest of either 10 degrees centigrade below ambient temperature, or 10 degrees centigrade (this being cut from 20 degrees), at any time when the car is running after leaving the competitor’s designated garage area.

3. 2023 FIA FORMULA 1 WORLD CHAMPIONSHIP™

3.5 POINTS & CLASSIFICATION

Points & Classification - The top ten finishers in each Grand Prix score points towards both the drivers' and the constructors' world championships, according to the following scale:

Position	1st	2nd	3rd	4th	5th	6th	7th	8th	9th	10th
Points	25	18	15	12	10	8	6	4	2	1

Bonus points

The driver who records the fastest lap of the race will get one bonus point. However, the driver must also finish in the top 10 in order to qualify for the point. This is to stop all the drivers outside the top 10 pitting for fresh tyres in the last few laps in an effort to set a fastest lap, which would compromise the integrity of the race.

Sprint Events

Formula 1 introduces six F1 Sprint events, with the number of events doubling from three staged in 2021 and 2022.

F1 Sprint sees the standard one-hour qualifying session shifted to Friday, setting the grid for a 100-kilometre dash on Saturday, which in turn sorts the starting order for Sunday's main event.

Next year, the Sprints will be held in Azerbaijan (Baku City Circuit), Austria (Red Bull Ring), Belgium (Spa-Francorchamps), Qatar (Lusail Circuit), the United States (Circuit of The Americas) and Sao Paulo (Interlagos).

Interlagos continues as a Sprint venue after playing host in 2021 and 2022, while the Red Bull Ring also featured the revised format last season. Silverstone, Monza and Imola are the other venues to have hosted Sprints in the past.

The 2023 selection came following research into the most suitable tracks for the format, including overtaking opportunities, close racing and high-speed sections - and is designed to ensure competitive on-track action across all three days of the selected Grand Prix weekends.

F1's financial regulations have also been tweaked, as the sport's governing body the FIA announced the teams' cost cap allowance for each Sprint will double from next year onwards, from \$150,000 to \$300,000 - though there will no longer be any further allowance for accident damage sustained in the Sprint events.

Formula 1 President and CEO Stefano Domenicali welcomed the increase from three to six events for next year.

"We have seen a hugely positive reaction to the F1 Sprint events during the first two years of its running, and we can't wait to bring even more action to fans with six events next year, including our first US F1 Sprint in Austin," he said.

"The introduction of the F1 Sprint has created a race weekend that includes three days of competitive racing action and brings more entertainment to fans of the sport as well as additional value for key stakeholders including teams, broadcasters, partners, and host venues."

3.5 POINTS & CLASSIFICATION

Mohammed Ben Sulayem, President of the FIA added: "Following strong collaboration between the FIA and FOM, and the approval of the World Motor Sport Council, we are pleased to reveal the six events for Sprints for the 2023 season. We look forward to this exciting addition to the calendar."

5. 2023 FIA FORMULA 1 WORLD CHAMPIONSHIP™ CIRCUIT CHARACTERISTICS

FORMULA 1 GULF AIR SAHARA GRAND PRIX 2023 SAHIR

Date	03 - 05 March	Race distance	308.238 km
Circuit length	5.412 km	Number of laps	57

The Bahrain International Circuit has established itself as a popular host for world-class motor sport. Professional facilities and experienced staff have paved the way for numerous international race series to utilize the circuit, including Formula 2/ Formula 3 Championship and Porsche Sprint Challenge Middle East.

You can usually expect great racing and decent amounts of overtaking in Bahrain, while the drivers have to contend with wind, racing under floodlights and the difficulty of finding a decent set-up with the wide temperature fluctuations between sessions. The track's most challenging point is the tight, downhill, off-camber Turn 10 left-hander, while the fast run through Turn 12 is another highlight, allowing the racers to really feel their cars coming alive.

FORMULA 1 STC SAUDI ARABIAN GRAND PRIX 2023 JEDDAH

Date	17-19 March	Race distance	308.45 km
Circuit length	6.174 km	Number of laps	50

The return of F1 to Jeddah will be third time in less than 16 months that the pinnacle of motorsport will race on the world's fastest and longest street circuit since the inaugural Saudi Arabian Grand Prix took place in 2021. The race joining its Middle Eastern counterparts in Bahrain and Abu Dhabi - while like those races, the Saudi Arabian Grand Prix also takes place under floodlights.

The circuit is fast. Very fast. Average speeds around the Jeddah Corniche Circuit are around 250km/h - quicker than those at Silverstone, and second only to Monza - aka 'The Temple of Speed'. It is, quite simply, the fastest street circuit ever seen in Formula 1 - while the track also features the most corners on the calendar with 27, many of them quick, sinuous bends as the drivers wend their way along the Jeddah waterfront.

**FORMULA 1 ROLEX AUSTRALIAN GRAND PRIX 2023
MELBOURNE**

Date	31 Mar - 02 Apr	Race distance	307.574 km
Circuit length	5.303 km	Number of laps	58

As a temporary facility, Albert Park can be quite bumpy, while the circuit at the start of the weekend is often slippery, rubbering in as the sessions progress. It's also a circuit that requires a well-sorted chassis, with several spots on the track where the drivers require a reactive front end to allow them to chuck it into a corner - the main one being the rapid Turn 11-12 chicane. Melbourne is also one of the faster tracks on the calendar, with Lewis Hamilton's 2019 pole lap set at an average of over 235km/h.

BAKU**

Date	28 - 30 Apr	Race distance	306.049km
Circuit length	6.003 km	Number of laps	51

The six kilometre, anti-clockwise layout of the circuit offers a mixture of wide and open straights as well as tight and twisty corners. The circuit starts with a long main straight along the Baku shoreline, then loop around Government House before heading west to Maiden Tower. Here, the track has a narrow uphill traversal and then circle the Old Town before opening up onto a 2.2 km (1.4 mi) stretch along Neftchilar Avenue back to the start line.

FORMULA 1 CRYPTO.COM MIAMI GRAND PRIX 2023 MIAMI

Date	05 - 07 May	Race distance	308.37 km
Circuit length	5.41 km	Number of laps	57

Having made its F1 debut in May 2022, the Miami International Autodrome is a temporary circuit, but one designed to have a permanent feel. Set in the Hard Rock Stadium complex in Miami Gardens, home to the NFL's famous Miami Dolphins franchise, the track is the culmination of a development process that simulated no less than 36 different layouts before settling on a thrilling, 19-turn lap that provides a street circuit vibe, not dissimilar to Melbourne's Albert Park.

The Florida race is one of three US races on the calendar alongside the Austin and Las Vegas Grand Prix.

FORMULA 1 QATAR AIRWAYS GRAN PREMIO DELL'EMILIA ROMAGNA 2023 IMOLA

Date	19 - 21 May	Race distance	309.049 km
Circuit length	4.909 km	Number of laps	63

Imola had its foundation stone laid in March 1950. It was ready for testing by October 1952, while racing began at the circuit in 1953. The track was first awarded the honour of hosting the Italian Grand Prix in 1980. From 1981, Imola was taking on its famous 'San Marino' title and going on to host a total of 27 Grand Prix up until 2006. Imola returned to the F1 calendar amid the Covid-19 changes of 2020 and only recently signed a contract until 2025.

The circuit offers a thrill ride. After testing his AlphaTauri AT01 at the track in the build-up to the 2020 season, Pierre Gasly called the experience one of the best he'd ever had in a Formula 1 car, while his then-team mate Daniil Kvyat remarked that "an F1 car through corners like Acque Minerali - the entrance is so fast, it's so cool. It really gives you a lot of adrenaline." The anti-clockwise circuit is certainly fast, with an old-school feel as the drivers put it on the line in iconic corners like the aforementioned Acque Minerali and Piratella.

**FORMULA 1 GRAND PRIX DE MONACO 2023
MONTE CARLO**

Date	26 - 28 May	Race distance	260.286 km
Circuit length	3.337 km	Number of laps	78

Monaco remains one of the most prestigious and iconic auto races in the world, long recognized for its entertainment and celebrity presence. It is a track nearly all drivers love, forcing them to put their skills on the line and rewarding millimetric accuracy. Overtaking on the tight streets is harder, however, with the 2003 Gran Prix witnessing a grand total of zero passing moves.

Motorsports most famous street circuit takes six weeks to build up and organize, offering drivers with the challenge of negotiating numerous elevations shifts and very tight corners, including one of the slowest corners in F1 racing as well as one of the fastest.

**FORMULA 1 AWS GRAN PREMIO DE ESPAÑA 2023
CIRCUIT DE BARCELONA-CATALUNYA**

Date	02 - 04 Jun	Race distance	308.424 km
Circuit length	4.675 km	Number of laps	66

The Circuit de Catalunya was built in 1989 through the efforts of a Consortium composed of the Catalan Government, the Reial Automòbil Club de Catalunya (RACC) and the Montmeló Town Council. In September 1991, the 35th Spanish F1 Grand Prix was held following a seventeen-year of absence in Catalonia. Today, the circuit is a familiar site for teams and drivers as the track is used for extensive offseason testing. The circuit underwent resurfacing and track modifications over last year's winter and is a good mix of high- and low-speed corners, with the challenging Turn 3 right-hander a great chance to evaluate the balance of the car.

The track offers plenty of choice for spectators with almost the whole track overlooked by grandstands or general admission areas. On the outside of Turn 1, Grandstand A will let you see the best overtaking spot on the track, while the general admission area around Turn 3 will provide the awe-inspiring sight of Formula 1 cars being pushed to the limit of their downforce capabilities.

FORMULA 1 PIRELLI GRAND PRIX DU CANADA 2023
CIRCUIT GILLES VILLENEUVE

Date	16 - 18 Jun	Race distance	305.27 km
Circuit length	4.361km	Number of laps	70

The fast, low-downforce circuit is one of the drivers' favourites. The track is quite stop-start, with lots of heavy-braking chicanes and the famous hairpin to get the anchors working hard. Out of the corners, though, the track is quick and flowing, while the most iconic piece of the circuit comes right at the end of the lap: the Wall of Champions, so-called after excursions into it from Damon Hill, Jacques Villeneuve and Michael Schumacher during the 1999 Canadian Grand Prix weekend.

**FORMULA 1 GROSSER PREIS VON OSTERREICH 2023
SPIELBERG**

Date	03 Jun - 02 Jul	Race distance	306.452 km
Circuit length	4.318km	Number of laps	71

Previously known as the A1-Ring Formula 1 arrived there in 1997, one year after the track was opened.

The Red Bull Ring packs a lot into a short lap. The first half rewards power, as the cars blast along three straights separated by a pair of uphill right-handers. But then as the drivers work their way downhill, the circuit becomes a regular toboggan ride, as the cars canyon through a series of quick corners, including the exhilarating Rindt right-hander, named for Austria's first F1 champion.

**FORMULA 1 ARAMCO BRITISH GRAND PRIX 2023
SILVERSTONE**

Date	07 - 09 Jul	Race distance	306.198 km
Circuit length	5.891 km	Number of laps	52

The inaugural of the first Formula 1 World Championship round on May 13th, 1950 was hosted at Silverstone. Since it continues to be a top draw for fans of Formula 1, offering a rich tradition of racing, a fast and challenging track, as well as the constant prospect of weather playing a critical role in race day strategy. It's hard to stop the goose bumps from prickling as you walk around one of the great cathedrals of motorsport, while in terms of atmosphere, the British fans are always reliably raucous.

At the 2018 British Grand Prix, Lewis Hamilton compared a flat-out lap around Silverstone to flying a fighter jet, which should tell you all you need to know about the Northamptonshire circuit. Despite numerous layout changes over the years, Silverstone has always maintained its essential character as one of the fastest tracks on the F1 calendar, while historic corners like Maggotts, Becketts and Abbey provide some of the biggest challenges for racing drivers anywhere in the world.

**FORMULA 1 QATAR AIRWAYS HUNGARIAN GRAND PRIX 2023
BUDAPEST**

Date	21 - 23 Jul	Race distance	306.630 km
Circuit length	4.381 km	Number of laps	70

Home of the first Grand Prix to have been held behind the “Iron Curtain” in 1986. The Hungaroring was built in record time and remains today a major attraction in Hungary.

Held in the summer, the circuit is built in a natural bowl allowing excellent vantage points for spectators. That means that any of the grandstands located on or around the main straight should provide a view of other parts of the track too.

The lack of straights at the Hungaroring often sees it compared to a karting circuit - and it’s true, the resemblance is uncanny. With several series of corners to string together, teams opt for Monaco levels of downforce, with a well-sorted chassis tending to be rewarded over horsepower given the short straights on offer. It’s a challenge many of the drivers relish, however, with finding a good rhythm key to setting fast lap times.

**FORMULA 1 MSC CRUISES BELGIAN GRAND PRIX 2023
SPA - FRANCHORCHAMPS**

Date	28 - 30 Jul	Race distance	308.052 km
Circuit length	7.004 km	Number of laps	44

The Circuit de Spa-Francorchamps is legendary among race enthusiasts for its long-standing history and unique setting. It is considered one of the most challenging tracks in the world, mainly due to its fast, hilly, and twisty layout within the Ardennes Forest. The size of the track and the nature of Belgian weather means it can sometimes be raining on one part of the track and dry on another, meaning grip can vary from one corner to the next.

Spa is among Formula 1 drivers' most loved tracks, with its mix of long straights and challenging fast corners allowing them to push their cars to the edge of their capabilities - if it's dry, that is. The size of the track and the nature of Belgian weather means it can sometimes be raining on one part of the track and dry on another, meaning grip can vary from one corner to the next. Keep an eye on the thrilling Eau Rouge, arguably the most famous sequence of corners in the world, as the drivers flick left, right, and then up the hill through Raidillon.

FORMULA 1 HEINEKEN DUTCH GRAND PRIX 2023 ZANDVOORT

Date	25 - 27 Aug	Race distance	306.587 km
Circuit length	4.259 km	Number of laps	72

Zandvoort was first opened in 1948, part of the wave of post-war motorsport enthusiasm that swept across Europe. Originally made up of a mixture of permanent track and public roads that snaked through the sand dunes of the Zandvoort resort town, the Dutch Automobile Racing Club - who initiated the plans for the circuit - brought in 1927 Le Mans winner Sammy Davis to consult on the layout for the original 4.2km track. After a break since 1985, Formula 1 returned to Zandvoort in 2021.

The current F1 drivers describe the track 'really quick', 'pretty insane', 'crazy' and 'old-school' that many of them tackled in their junior category days. We'd also add 'undulating' to that list. The Zandvoort track swoops and flows through the sand dunes, creating a rollercoaster-like feel to the lap.

FORMULA 1 PIRELLI GRAN PREMIO D'ITALIA 2023 MONZA

Date	01 - 03 Sep	Race distance	306.72 km
Circuit length	5.793 km	Number of laps	53

The Autodromo Nazionale Monza was built in just 110 days and is the world's third purpose-built racetrack, coming after Brooklands in the UK and Indianapolis in the US. Monza opened its doors on September 3, 1922, just a week before it hosted that year's Italian Grand Prix. It was then part of the original Formula 1 calendar in 1950 and has held the Italian Grand Prix every year bar one since.

Formula 1's fastest ever lap was set at Monza - Williams driver Juan Pablo Montoya's 260.6km/h effort during practice for the 2004 Grand Prix - which should give you some idea of the nature of the track the locals call 'La Pista Magica'. Cars are on full throttle for 80% of the lap and hit their Vmax on the circuit's 1.1km start/finish straight. From there, they roar off into the historic park section, where a series of big stops into tight chicanes give the brakes a good workout.

**FORMULA 1 SINGAPORE AIRLINES SINGAPORE GRAND PRIX 2023
MARINA BAY STREET CIRCUIT**

Date	15 - 17 Sep	Race distance	308.706 km
Circuit length	5.063 km	Number of laps	61

In 2008, Singapore had the honour of hosting the first night-time race in F1 history. The Grand Prix - the 15th round of that season - proved a huge hit with the teams and drivers, while Renault's Fernando Alonso claimed a controversial victory.

The 5.063km Marina Bay Circuit is one of the most physically demanding on the calendar, its bumpy street surface coupled with humid conditions giving the drivers plenty to think about. With 23 corners, they are working the wheel a lot, too, around the high-speed lap - the physical stress causing them to lose as much as 3kg over the course of a race. The circuit also boasts some of the most unique features of any track on the F1 calendar, including Turn 18, which actually sees the drivers pass underneath a grandstand.

**FORMULA 1 LENOVO JAPANESE GRAND PRIX 2023
SUZUKA INTERNATIONAL RACING COURSE**

Date	22 - 24 Sep	Race distance	307.471 km
Circuit length	5.807 km	Number of laps	53

Designed as a Honda test track in 1962, the circuit is another of the racer's favourite, featuring some of the most challenging corners. Among the most popular are the high-speed 130R and the famous Spoon Curve. Its "figure-of-eight" layout also makes the track unique in F1 racing, where the back straight passes over the front via an overpass.

**FORMULA 1 QATAR AIRWAYS QATAR GRAND PRIX 2023
LUSAIL INTERNATIONAL CIRCUIT**

Date	06 - 08 Oct	Race distance	306.66 km
Circuit length	5.38 km	Number of laps	57

The circuit was built within just over a year in preparation for hosting Qatar's first ever MotoGP event in 2004. In 2021 Qatar hosted Formula 1 for the very first time and signed an additional 10-year deal to host the sport from 2023.

The track is fast and flowing where medium- and high-speed corners predominate. Over one kilometre of the track's total length is made up of the main straight, which provides plenty of overtaking opportunities into Turn 1.

FORMULA 1 LENOVO UNITED STATES GRAND PRIX 2023
CIRCUIT OF THE AMERICAS

Date	20 - 22 Oct	Race distance	308.405 km
Circuit length	5.513 km	Number of laps	56

The Circuit of The Americas, designed by Hermann Tilke in collaboration with American architectural firm HKS, endured something of a nervy start, with construction suffering several setbacks. It was well worth the wait, though, when 1978 F1 champion Mario Andretti opened the track on October 21 2012.

If the corners at COTA seem familiar, they should be. Turns 3 through 6 look not dissimilar to Silverstone's high-speed run through Maggotts/Becketts or the S Curves at Suzuka, while Turns 12 through 15 mimic Hockenheim's stadium section. Meanwhile, the uphill run into wide, wide Turn 1 - hey, everything's bigger in Texas, right? - has provided some fine overtaking action in the track's short life.

FORMULA 1 GRAN PREMIO DE LA CIUDAD DE MÉXICO 2023 MÉXICO CITY

Date	27 - 29 Oct	Race distance	305.354km
Circuit length	4.304 km	Number of laps	71

In 1959, the father of Mexico's most famous racing brothers, Ricardo and Pedro Rodriguez, was an advisor to Mexican President Adolfo Lopez Mateo, and had a word in his boss's ear about building a racing circuit in Mexico City's Magdalena Mixiuhca sports park using the existing internal roads. El Presidente liked the idea, and work on the track was completed in under a year.

The racetrack is located over 2,200m above sea level, which makes it the highest altitude venue on the F1 calendar. The thin air at this altitude presents a unique challenge for cars and drivers.

To put it in perspective, Brazil's Interlagos, the second-highest race location, is at around 800m above sea level.

FORMULA 1 ROLEX GRANDE PRÊMIO DE SÃO PAULO 2023 AUTÓDROMO JOSÉ CARLOS PACE

Date	03 - 05 Nov	Race distance	305.879 km
Circuit length	4.309 km	Number of laps	71

Building work began on what ended up being called the Autodromo Jose Carlos Pace - but what is more commonly referred to as Interlagos - all the way back in 1938. The track designers took their inspiration from three main circuits: Brooklands in the UK, Roosevelt Raceway in the USA and Montlhery in France.

Buoyed by the success of Brazil's Emerson Fittipaldi, Formula 1 first jetted into Interlagos for a world championship race in 1973. Fans were treated to a home win in the first three Brazilian Grands Prix, with Fittipaldi victorious in 1973 and 1974, while Carlos Pace won in 1975.

**FORMULA 1 HEINEKEN SILVER LAS VEGAS GRAND PRIX 2023
LAS VEGAS**

Date	16 - 18 Nov	Race distance	305.88 km
Circuit length	6.12 km	Number of laps	50

Las Vegas hosted two Formula 1 race in 1981 and 1982 on a temporary track next to the Caesars Palace hotel. This years' return to Formula 1 will take place in the heart of downtown Las Vegas - the new 6.12km, 14-turn street circuit winds its way past iconic locations like the aforementioned Caesars Palace, the Bellagio and the Venetian. With average speeds expected to match Monza, otherwise known as F1's "Temple of Speed", there promises to be plenty of action and overtaking.

FORMULA 1 ETIHAD AIRWAYS ABU DHABI GRAND PRIX 2023 YAS MARINA CIRCUIT

Date	24 - 26 Nov	Race distance	306.183 km
Circuit length	5.281 km	Number of laps	58

The Hermann Tilke-designed track, inaugurated in 2009 and located on Yas Island is Formula One's first ever day-night race, starting in the afternoon and finishing after sunset. Floodlights are activated from the start of the race to provide a transition into the evening.

The circuit is dominated by its 1.2km straight between Turns 7 and 8 - which, with slow-speed corners marking its beginning and end, makes it a honeypot for overtaking moves. Other highlights include the tricky run through Turns 15 and 16 into 17, which forces the drivers to brake hard with bags of lateral load still on the car.

6. SUPPORT RACE

6.1. PORSCHE DELUXE CARRERA CUP NORTH AMERICA

INTRODUCTION

Porsche Deluxe Carrera Cup North America is the premier one-make race series in the United States and Canada utilizing a combination of the latest Porsche 911 GT3 Cup racecar, type 992, and MICHELIN® Pilot® Sport Cup N3 racing slick to challenge the best road and street race courses on the continent. The third season of the championship is scheduled to host 16-rounds at eight venues. Each 40-minute race counts toward a season-long driver and team championship in each of three classes: Pro, Pro-Am and Am.

As the pinnacle one-make series of the Porsche Motorsport Pyramid North America, the series is a launching point for young drivers looking to move up to open competition. Previous champions Seb Priaulx (2021), Parker Thompson (2022) and two-time runner-up Kay van Berlo have each moved into the IMSA WeatherTech SportsCar Championship with competitive GTD teams in the 2023 season. More on Porsche Deluxe Carrera Cup North America can be found at www.PorscheCarreraCup.us.

WHERE TO WATCH

All rounds of the 2023 Porsche Deluxe Carrera Cup North America will again be found on a wide range of streaming options. IMSA.tv, the NBC Peacock streaming app and PorscheCarreraCup.us will all provide live coverage of each 40-minute race. Once the checkered flag has fallen, all rounds will be archived on the series YouTube channel: Porsche Motorsport North America TV presented by Deluxe (<https://www.youtube.com/c/PorscheMotorsportNorthAmerica>). The experts of IMSARadio will again provide commentary and color for the 16-race championship's race calls.
