	Updated component	Primary reason for update	Geometric differences compared to previous version	Brief description on how the update works (min 20, max 100 words)
1	Front wing	Performance - Local Load	Locally increased cambers to extract more load	An evolution of the design taking further research to increase the camber of some wing sections to extract more load whilst maintaining flow stability.
2	Engine Cover	Reliability	Increased topbody exit areas	Enlarged exit from the overall topbody which is more efficient than opening louvres or creating larger louvres to raise the overall cooling capacity.
