Subject: Throttle potentiometer sealing

From the 2026 FIA European Cross Car Championship, the throttle potentiometer of the Yamaha R6 and MT09 engines must be prepared to be sealed during the pre-event scrutineering by the FIA technical delegate.

After the throttle learning control procedure and its validation by the FIA technical delegate, a seal for the throttle potentiometer fixing screw will be installed.

YAMAHA R6 and MT09

- Remove the marked screw,

- The teams must prepare this bolt with a 1 mm bore to be able to fit a 0.8 mm sealing wire.

- The team must reassemble the prepared bolt and install the 0.8 mm sealing wire.
- The FIA seal will be affixed and sealed by the FIA technical delegate.
